

## **COVID-19 UPDATE!**

Over the last 2 weeks our world has changed right in front of us and unfortunately like the events of 911 these changes are a little scary. Our goal as a leader in healthcare for the aging population is to provide the highest level of care possible. We realize that the changes over the last 2 weeks have significantly changed the environment we are used too, but with the risk to the older population being so high these precautions are necessary. All buildings will remain on restricted visitation per the CDC/CMS and the Ohio Health Department (ODH). Unfortunately, this means that the only visitors allowed will be essential to the function of the building or for any residents going through end of life. All the buildings have multiple different ways to communicate with the residents whether that would be facetime, skype, or any other type of social media. We will continue to update everyone with any changes that occur; we will also continue with routine calls to all responsible parties to keep the communication lines open. Safety will always be our number 1 priority no matter how difficult the decisions may be to assure everyone's safety. We appreciate everyone's patience and understanding during this difficult time; we will all look back on this in a few months and realize we will all be better for going through this experience.

Sincerely,

Bill Meyer RN

Corporate Director of Clinical Services
